- Continuous learner

## PROJECTS

### Portfolio

*I have designed my own website that showcase my diverse skill set, projects, and achievements. I've created it using HTML, CSS, JavaScript.*  
(<https://bhagyaunnikrishnan.in>)

### AIDCAM

*A object detection model made using latest YoloV8 by ultralytics capable of detecting road accidents and alert the responsible authorities. The sample website is made using Django and for alerting messages Twilio is used.*

### Grocery Store Management System

*A store management system created for my college project using Django and sqlite3 as database.*

### Calculator

*A simple Scientific Calculator in Python using Tkinter.*

### PrepPortal

*Developed an innovative AI-Driven educational platform utilizing T5 Transformers and Unsupervised Keyword Extraction Algorithms for dynamic quiz question generation and assessment, including MCQ's, Fill-in-the-blanks, and True/False formats. The website is made using React, Next JS, Flask.*  
(<https://preportal.in/>)

### Todo App

*A fully functional To-do App with login, user registration, and user friendly UI/UX made using Django.*  
(<https://todo-app-brown-chi.vercel.app/>)
